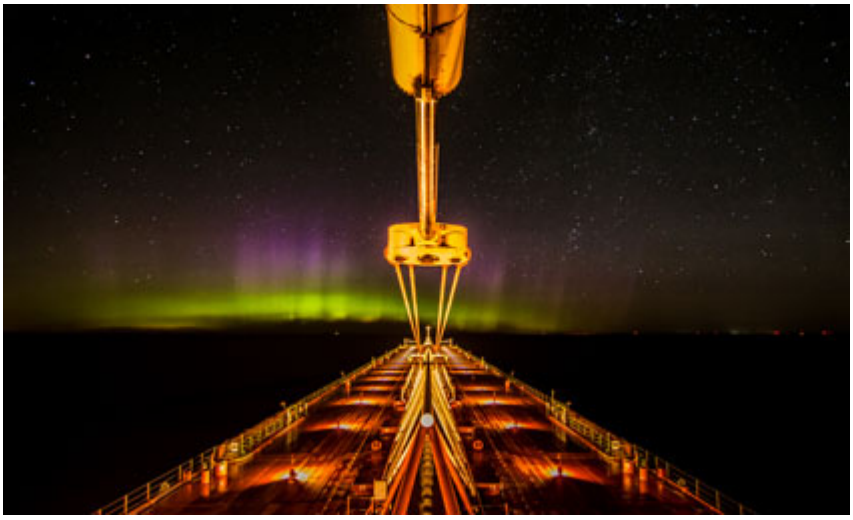
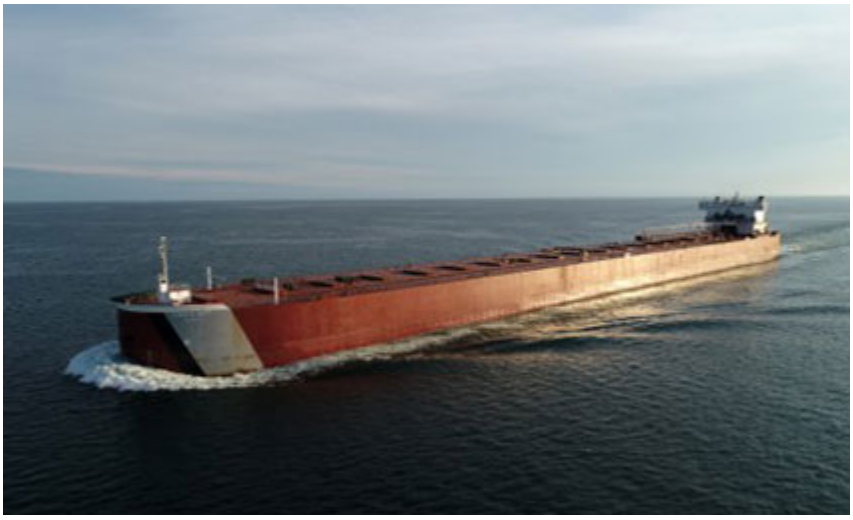
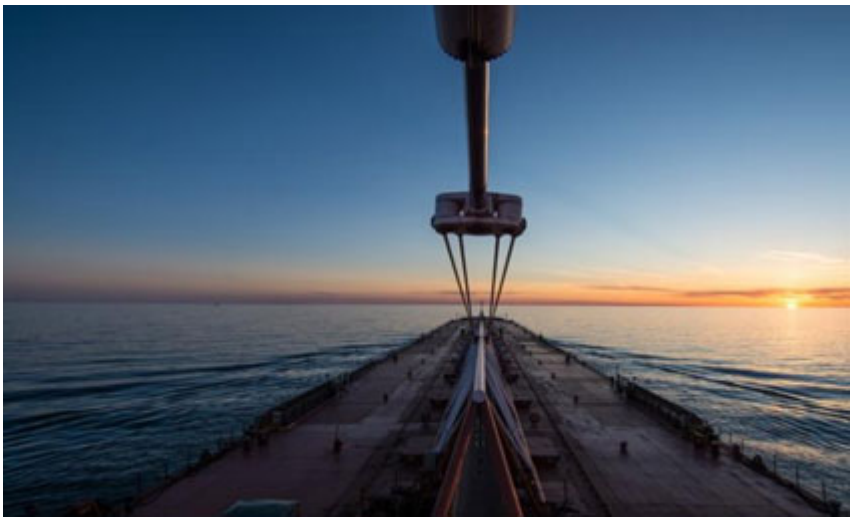
GREAT LAKES FLEET

M/V EDWIN H. GOTT



EDWIN H. GOTT





Name:

- M/V Edwin H. Gott
- The vessel is named after Edwin H. Gott, a former president of the United States Steel Corporation.

Did You Know?

- The vessel was constructed by Bay Shipbuilding Company in Sturgeon Bay, Wisconsin, USA. It was launched in 1978 and entered service in 1979.
- The vessel is a self-unloading bulk carrier with a maximum carrying capacity of around 74,100 gross tons. It is primarily designed for transporting iron ore and other bulk cargoes on the Great Lakes.
- The Edwin H. Gott is equipped with a self-unloading system, allowing it to discharge its cargo without the need for shoreside equipment. This feature enhances its efficiency in the transport of bulk materials.
- The bulk carrier primarily operates on the Great Lakes, transporting iron ore and other commodities between ports on the Great Lakes.
